

IN THE CLAIMS

1. (Currently Amended) A method, comprising:
receiving information associated with ~~[[a]]~~an initiated telephone call that has been placed
~~by~~involving a first party ~~[[and]]~~to a second party;
allocating a storage space that is accessible by at least ~~one of~~ the first party and the
second party based on at least a portion of the received information; and
allowing at least one of the first party and second party to exchange one or more
electronic files with the other party using the storage space.
2. (Currently Amended) The method of claim 1, wherein allocating the storage
space comprises allocating the storage space associated with a server on the Internet, ~~and~~
~~wherein the storage space is accessible by both the first party and the second party.~~
3. (Original) The method of claim 2, wherein receiving the information comprises
receiving at least one of information associated with a name of a calling party, information
associated with a name of a called party, information associated with a telephone number from
which the telephone call originates, information associated with a telephone number to which the
telephone call is made, information associated with a time of the telephone call, and information
associated with a date of the telephone call.
4. (Previously Presented) The method of claim 1, wherein allocating the storage
space comprises defining an electronic folder for each telephone call made by at least one of the

first party and the second party, wherein each electronic folder is adapted to store one or more electronic files that are exchanged by the first and second party during that call.

5. (Previously Presented) The method of claim 1, wherein the act of allowing comprises allowing the second party to provide one or more electronic files intended for the first party using the storage space.

6. (Original) The method of claim 1, further comprising determining if at least one of the first party and second party is authorized to access the storage space and wherein the act of allocating the storage space comprises allocating the storage space based on determining that at least one of the first party and second party is authorized to access the storage space.

7. (Previously Presented) The method of claim 6, wherein the act of determining comprises determining if at least one of the first party and the second party is on a call block list and determining if at least one of the first party and the second party is a subscriber.

8. (Original) The method of claim 1, wherein the telephone call is managed by a service provider, and wherein receiving the information comprises at least one of receiving the information provided by the service provider and accessing caller identification information associated with the telephone call.

9. (Original) The method of claim 1, wherein the telephone call is a conference call, and wherein the act of receiving comprises receiving the information associated with the conference call involving the first party, the second party, and a third party.

10. (Original) The method of claim 1, wherein the act of allocating comprises creating an electronic folder associated with each of the first party and the second party and further associating the two electronic folders with each other.

11. (Currently Amended) The method of claim 1, ~~wherein the first party is the calling party and the second party is the receiving party,~~ wherein the act of allowing comprises allowing the calling party to provide to the receiving party at least one of a graphics file, a video file, an audio file, and a multimedia file.

12. (Original) The method of claim 1, wherein the storage space is associated with a remotely located server, and wherein the act of allowing comprises allowing the first party to upload an electronic file to the storage space by at least one of dragging and dropping the electronic file in a selected window and transferring the electronic file using a desirable file transfer protocol.

13. – 30. Cancelled.

31. (Currently Amended) A method, comprising:

accessing a storage space that is allocated based on information associated with a telephone call involving a first party and a second party, wherein the storage space is accessible to at least the first party and second party; and accessing one or more electronic files from the storage space, wherein the one or more electronic files are being exchanged by at least one of the first party and second party using the storage space.

32. (Previously Presented) The method of claim 31, wherein accessing the storage space comprises gaining access to a server by providing login information.

33. (Original) The method of claim 31, wherein accessing the storage space comprises accessing an electronic folder to which both the first party and the second party have access.

34. (New) The method of claim 1, wherein allocating the storage space comprises allocating the storage space associated with a server on the Internet, and wherein the storage space is accessible by at least the first party and the second party;

wherein allocating the storage space comprises defining an electronic folder, wherein the electronic folder is adapted to store one or more electronic files that are exchanged by the first and second party during that call;

wherein the act of allowing comprises allowing the second party to provide one or more electronic files intended for the first party using the storage space and allowing

the first party to provide one or more electronic files intended for the second party;

wherein the telephone call is managed by a service provider, and wherein receiving the information comprises at least one of receiving the information provided by the service provider and accessing caller identification information associated with the telephone call.

35. (New) The method of claim 34, wherein the first party and the second party each subscribe to a service that allocates the storage space, and wherein allocating the storage space comprises allocating dynamically in response to determining that the first and second parties are authorized subscribers.

36. (New) The method of claim 9, wherein the exchange is allowed by a service provider, and wherein at least the first party and the second party are service subscribers but not the third party, and wherein the exchange is allowed by the service to those parties of the conference call that are subscribers of the service provider.
